

PLEASE NOTE OUR NAME CHANGE

Bill Van De Yacht Water Well presents

Bill Van De Yacht began well drilling in 1963 and was one of the first to adopt a rotary well drilling rig in 1967. The rotary rig increased the time to complete a well from over a week to only one day, a major increase in efficiency. In 1988 he named the company Bill Van De Yacht Water Well and Specialized Drilling, Inc. This name served us well for over 20 years. With Bill's retirement in 2004 and our continually changing market, we are excited to introduce Ground Source, Inc.

Why are we so excited about our name change??

People are discovering Geothermal as a way to save money on their heating and cooling costs. This has resulted in Geothermal Installations becoming a large portion of our business.

We wanted to simplify our name - making it easy to say and remember.

If you need a hole in the ground - we are your **Ground Source**. Water Wells, Geothermal or Environmental Monitoring Wells.

If you have hired us in the past, thank you and rest assured you will be dealing with the same experienced people you have grown to trust, but with a renewed focus on you. If you have not used our services in awhile - give us try. I am confident you will be pleased with our service and dedication to becoming your choice for drilling.

Remember, **Ground Source** for all of your **water well** and **geothermal projects**.

We look forward to working with you.

Tom VanDeYacht
President

Luke Cieslewicz
Project Manager

P.S. Put us in touch with your heating and cooling contractor to put together a geothermal option on your next home building project. We offer discounts for water well/geothermal combinations.
